Précautions :

Nos robinetteries doivent être installées par des installateurs professionnels en respectant les réglementations et normes en vigueur, les prescriptions des bureaux d'études et les règles de l'art.

Prévoir des conduites d'arrivée d'eau correctement dimensionnées pour garantir de bons débits.

La pression de service doit être limitée à 5 bars.

L'installation de vannes d'arrêt à proximité est recommandée afin de faciliter l'intervention lors d'entretiens.

Voorzorgsmaatregelen :

Ons kraanwerk dient te worden geplaatst door professionele installateurs conform de reglementeringen en geldende normen, de voorschriften van de studiebureaus en de regels van de kunst.

De aanvoerleidingen zullen een diameter hebben welke garant staan voor voldoende debiet.

De dienstdruk moet beperkt zijn tot 5BAR

Om het onderhoud van de kranen te vergemakkelijken is het aangeraden om de shellkranen dicht bij het kraanwerk te plaatsen.

Precautions :

Our faucets must be installed by professional plumbers in accordance with the regulations and applicable standards, the regulations of the engineering firms and best practices.

The supply pipes will have a diameter which guarantees sufficient flow.

The service pressure will be limited to 5 bars

To facilitate the maintenance of the faucets it is recommended to place the stop valves nearby.
